***Reasons for Allowance***

1. Claims 1-29 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fails to teach the claims invention of a computerized decision processor whereby at least one event based on an instantaneous recommendation value of the recommended event at the requested time developed from a personal schedule modification system wherein the Fuzzy-Now recommendation functions are customized by weights related to a personalized scheduling system and where the Fuzzy-Now recommendation represents a function related to an event being presented at a particular time on a particular channel.

The closest prior art (Klarfeld et al, U.S. Pub 2003/0067554) teaches a system and method for personalized TV. Specifically, a personalized TV system receives a plurality of video segments constituting a TV program and information describing each segment, and controls the display of the segments to a viewer in accordance with preferences of the viewer and with the description of each segment. Klarfeld does not teach a decision instance related to a Fuzzy-Now function valued for each event (channel and time) that is further modified by weights related to a personal schedule if such weights are necessary. The Fuzzy-Now function is temporal and in the specific application, yields a value for a current show.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
